

With **RSI**...

“You Have More Solar Options Than you Thought!”

In the past, home owners, building owners and managers have had limited options for installing solar...

Now, **RSI Roofing, Inc-**
San Diego's Roofing Leader-
Brings you Commercial & Residential
Solar options:

- Single Ply (thin film)
- Tile
- Glass
- Traditional Rack (Roof or Ground)

Option 1

Single Ply/TPO

Super-Lightweight Photovoltaic system that laminates to a highly reflective roof membrane, generating solar energy and reducing heat. Able to generate power even when the weather is overcast.

Option 2

Tile

State-of-the-art photovoltaic system that can be blended into virtually every conceivable structure including concrete, s-tile, slate, or shake to enhance the visual appeal of your home or commercial building.

Option 3

Glass

Stunning photovoltaic design provides the benefits of glass & solar power. Solar cells can be incorporated into the façade of a building, complementing or replacing traditional view or spandrel glass offering brilliant transparency in a cool ventilated environment.

Option 4

Traditional Rack Frame

Solar panels that incorporate electricity generation into your new or existing shade structures for car parking, outdoor walkways and/or gathering places. Adds a design element to the landscape and gives you the flexibility to integrate solar into your existing structure.
