

Carlisle SynTec Incorporated

PRODUCT USED

Carlisle Single-Ply Fleeceback TPO

PROJECT NAME

Jacob Health Care Center, San Diego, CA

OVERVIEW

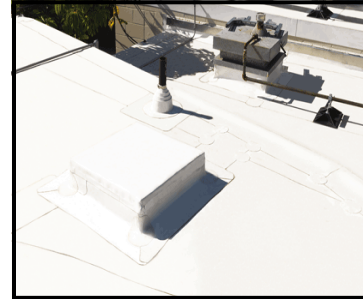

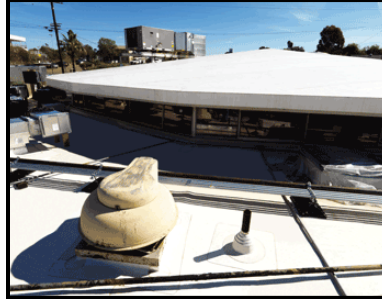

RSI Roofing was contracted by Jacob Healthcare to install a Carlisle Single Ply Fleeceback TPO system. Because of the existing services and occupied facility (nursing home), it made for a very challenging project. RSI worked on only one of the building's six roof sections at a time, completing one before moving onto the next in order to minimize rooftop noise and internal disruptions. Besides adding considerable R-value and increased energy performance to the rooftop, RSI installed the system with an environmentally-friendly, non-penetrating solution, meaning there are no noisy fasteners or hazardous adhesives.

As seen on Architectural West Magazine

TESTIMONIAL

"RSI's willingness to invest in the latest technologies was a primary reason we won this bid," said Sid Scott, sales manager for RSI. "Our owner, David Susi, bought a Predator® spray rig a little over a year ago to take advantage of the growing popularity of the FleeceBACK – FAST system in the California roofing market."

PROJECT BACKGROUND

Project Info	Having replaced portions of or repaired the faulty built-up roof (BUR) three times in the past four years, Jacob Healthcare needed a permanent solution for a reliable, energy efficient roof that didn't leak.
Full address	4075 54 th St, San Diego, CA 92105
Age of the building	Built in 1961
Existing Roof system	Built-up roof with gravel ballast
Square footage	22,000 sq. ft.
