

## **RSI Re-Roofing AO Reed building**

**RSI Roofing** of San Diego has signed a contract with AO Reed to re-roof four different buildings located at their headquarters in Kearny Mesa. **RSI** is installing over 40,000 square feet of a *Carlisle* 60-mil Single-Ply TPO System. The new white-reflective roofing system will help offset energy costs associated by heat entering the building from the roof. *“Over 70% of our installations are now single-ply roofing systems. There is no doubt that the word is spreading that Single-Ply offers a clean, quiet installation at an affordable price and offers a better ROI for your building.”* –David Susi, president – **RSI Roofing**.
