

RSI Rain Gutter's installing rain gutters at the San Diego Opera

RSI Rain Gutters (a division of **RSI Roofing**) signed a contract with the San Diego Opera to install 640 feet of **RSI's** Galvalume Inlay Custom made rain gutters on the Scenic Studio building. The job entails tearing down the old gutters, installing the newly painted gutters while dealing with the challenges that come with a building that is four stories high.

"Being a division of the largest roofing company in San Diego (RSI Roofing) allows us to take on larger projects such as this one. We have the resources, the manpower and the insurance to complete these larger jobs safely and effectively," **Nick Rogers, RSI Rain Gutter Manager.**
