

RSI Rain Gutter's installing rain gutters at Sysco Foods

RSI Rain Gutters (a division of **RSI Roofing**) signed a contract with Sysco Foods of Poway, CA to install 700 feet of **RSI's** custom made 26-gauge rain gutters on Sysco's four story building. The job entails tearing down the old gutters, installing the newly painted gutters while dealing with the challenges that come with a building that is four stories high.

“Being a division of the largest roofing company in San Diego (RSI Roofing) allows us to take on larger projects such as this one. We have the resources, the manpower and the insurance to complete these larger jobs safely and effectively,” **Nick Rogers, RSI Rain Gutter Manager.**
