

RSI Roofing puts final touches on “The Q”

RSI Roofing of San Diego has signed a contract to roof downtown’s newest development, “The Q.” Already in the final stages, **RSI** has installed a *Firestone* fully adhered 60-mil Single-ply TPO system, which will provide the building with decreased energy costs because of the white-reflective roofing system that was chosen. The Q will be used as both a residence on the top floor with multiple office buildings below it.

“There are only a few roofing contractors in town that could handle the difficulty of this job. It has a double layer of fully adhered and tapered insulation of 60 mil TPO membrane. Considering the conditions, the difficulty and the high expectations, this job came out extremely well,” David Susi, President –RSI Roofing.
